Buffalo, NY

PROFESSIONAL SUMMARY

Software engineer with three Amazon SDE internships and CTO-level client delivery experience building backend, AI, data, and full-stack systems. Shipped client software across healthcare, operations, and startups; built Tenure, a LaunchNY cohort platform, and published quality infrastructure. Available full-time now; degree completion expected Spring 2027.

CORE COMPETENCIES

Backend & AI Systems

Python & TypeScript

REST APIs & Data Pipelines

Next.js & FastAPI

PostgreSQL & Supabase

MCP, Tooling & Client Delivery

WORK EXPERIENCE

Forward Automations 2023 – Present

CTO

- Delivered a Cleveland Clinic clinical-coaching MVP in 2 weeks for a regulated healthcare deployment.
- Built productivity software for a Cleveland architecture firm that increased operational output by 400%, deploying it in under 5 weeks.
- Developed AI marketing automation tools that reduced production timelines by 90% and generated 1.5M organic views for an a16z startup.

Deepr (a16z Portfolio Company) 2025

Technical Consultant

- Engineered AI content-generation tooling and an inline coverage-vector tool for real-time testing awareness during code review.

Amazon 2023 – 2025

Software Development Engineer Intern

- Completed three SDE internship terms across multiple teams, including Ads and FinTech/business-systems environments.
- Enhanced customer process efficiency and pipeline testing capabilities across distributed systems infrastructure.
- Built a data analytics project that provided actionable hiring insights to business leaders and hiring managers.

PROJECTS

Tenure LaunchNY Cohort

Pilot-ready organizational-intelligence platform turning specialist-led knowledge capture into reviewed SOPs, permissioned institutional memory, cited Q&A, and process intelligence.

Next.js | TypeScript | Supabase/PostgreSQL | RLS | LLM retrieval

BidCamp Live Closed Beta

Live closed-beta multi-tenant government-contracting SaaS with Claude-powered RFP analysis, procurement intelligence, compliance tracking, and human-reviewed digests.

Next.js | Supabase/PostgreSQL | RLS | Claude | Stripe

Quality Runner Published

Published read-only Python CLI and MCP server that compiles standards, detects checks, normalizes evidence-backed findings, and emits remediation artifacts.

Python | PyPI | MCP | CLI | Quality gates

EDUCATION

Case Western Reserve University – B.A. Computer Science Expected Spring 2027

Cleveland, OH | Minors: Artificial Intelligence, Applied Data Science, Statistics | Available for full-time work immediately

SKILLS

Languages: TypeScript, JavaScript, Python, Java, Go, SQL

Systems: React, Next.js, Node.js, FastAPI, Prisma, PostgreSQL, Supabase, Docker, AWS, MCP, LSP, CI/CD
