Professional Summary

Software engineer with three Amazon SDE internships and CTO-level client delivery experience, building backend, AI, data, developer-tooling, and full-stack systems. Shipped measurable software for healthcare, operations, and startup clients, including Tenure, a LaunchNY cohort knowledge platform, and published quality infrastructure. Available for full-time work immediately; degree completion expected Spring 2027.

Technical Skills

Languages

TypeScript, JavaScript, Python, Java, Go, SQL, R, MATLAB

Backend / AI

Next.js, Node.js, FastAPI, Express, PostgreSQL, Supabase, Prisma, Docker, AWS, MCP, LSP, LLM APIs

Product / Ops

React, tRPC, Socket.io, Expo, SQLite, CI/CD, data pipelines, analytics, full-stack architecture, client delivery

Experience

CTO | Forward Automations | 2023 - Present

- Delivered a Cleveland Clinic clinical-coaching MVP in 2 weeks for a regulated healthcare deployment.
- Built productivity software for a Cleveland architecture firm that increased operational output by 400%, deploying it in under 5 weeks.
- Led an end-to-end legacy refactor for STEM Playbook, launching a stable application in 11 days for a major live event.
- Developed AI marketing automation tools that reduced production timelines by 90% and generated 1.5M organic views for an a16z startup.

Technical Consultant | Deepr (a16z Portfolio Company) | 2025

- Engineered an AI-powered photo-carousel content-generation system and an inline coverage-vector tool for real-time testing awareness during code review.

Software Development Engineer Intern | Amazon | 2023 - 2025

- Completed three SDE internship terms across multiple teams, including Ads and FinTech/business-systems environments.
- Enhanced customer process efficiency and pipeline testing capabilities across distributed systems infrastructure.
- Built a data analytics project that provided actionable hiring insights to business leaders and hiring managers.
- Completed coding projects that improved team efficiency and broadened internal testing capabilities.

Selected Client & Product Systems

Tenure | LaunchNY Cohort Venture | AI Knowledge Platform | *Pilot-ready*

- Built a platform that turns specialist-led knowledge capture into reviewed SOPs, permissioned institutional memory, cited Q&A, and process intelligence reports.
- Implemented Next.js/TypeScript and Supabase/PostgreSQL systems with RLS, transcription, LLM extraction, hybrid retrieval, and human review gates; pre-pilot hardening is underway.

BidCamp | Multi-Tenant Government-Contracting SaaS | *Live closed beta*

- Built Claude-powered RFP analysis and proposal drafting, procurement intelligence, client and prime workflows, compliance tracking, and human-reviewed weekly digests for MBE/MWBE firms.
- Implemented Next.js, Supabase/PostgreSQL RLS, Stripe, Resend, PostGrid, scheduled jobs, and a GitHub scraping worker.

CrimClock | Legal Time Intelligence Platform | *Product build*

- Built neutral, explainable procedural-timing and sentencing workflows with statutes, rule configuration, exclusions, tolling, calculation steps, and explicit disclaimer language.

Hoopscout | Basketball Recruiting Intelligence | *Private beta*

- Built coach-facing search, athlete review, fit weighting, ranked school-fit signals, messaging, transcript controls, and moderation/trust operations.

Public Engineering Releases

Quality Runner | Python CLI ♦ MCP Server

- Built and published a read-only quality orchestrator that compiles standards, detects checks, normalizes evidence-backed findings, and writes versioned artifacts plus remediation plans.

Pre-CR Suite | Cross-Editor Developer Tooling

- Built a TypeScript monorepo with shared core/server contracts and an LSP workflow for changed-line coverage readiness across VS Code, Neovim, and headless CLI use.

Additional proof

AIOS local-first agent operating system; Terrace published spec-driven AI workflow CLI; Framework Labs reasoning-engine lab; Chiron's Forge multi-AI research product; Court Vision/BBDSE basketball simulation and analytics; Soundscape web/mobile monorepo; Dsci-proj survival-analysis pipeline and triage dashboard.

Education

Case Western Reserve University, Cleveland, OH

B.A. in Computer Science | Minors: Artificial Intelligence, Applied Data Science, Statistics | Expected completion: Spring 2027 | Available for full-time work immediately

Leadership & Community

- President & Founder, CWRU Flea Market: recurring events averaging 600+ attendees and roughly \$7K in revenue per event.
- Vice President, App Developers and Innovators Club: technical development opportunities and collaboration programming.

Awards & Honors

Proclamation declaring “Jakyé Amos Day,” City of Buffalo (2023) | Christine Davis Award (2023) | Amazon Future Engineer Scholar (2022) | National African American Recognition Program (2021)
